**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/19/2009 has been entered.

***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dan Hopper on 11/5/2009. The complete substance of the interview consisted of discussing the art of record to arrive at the agreed upon claim format detailed below. There was no exhibit or demonstration. In accordance with MPEP §713.04, since a complete record of the interview has been incorporated above in this examiner's amendment, no separate Interview Summary form is required. Nor is applicant required to supply any Interview Record in response to this Office Action.

The claims have been amended as follows:

**The entire text of claim 7 has been replaced with the following:**

--A device for fastening cable or tube to a base portion of a motor vehicle, the device comprising:

a carrier part having an open end, a closed end capable of holding the cable or tube, and a web extending from the open end;

a first connecting unit comprising a hollow sleeve that extends from the web;

a second connecting unit comprising a guide part that extends from the web and a holding part releasably engageable with the guide part for connecting the carrier part to the motor vehicle base portion;

wherein the guide part includes an outer sleeve that defines a guide cavity for receiving the holding part, the guide cavity having a cross section that is longer in a longitudinal direction than in a transverse direction, the longitudinal direction and the transverse direction being orthogonal to one another, the guide cavity including two longitudinal flat sections, at least one of the longitudinal flat sections including at least one engagement element;

wherein the holding part includes an inner sleeve having a smaller diameter than a diameter of the outer sleeve, the inner sleeve including two outer longitudinal flat sections that correspond with the longitudinal flat sections of the guide cavity, at least one of the outer longitudinal flat sections including at least one engagement element, the inner sleeve being inserted into the outer sleeve along an axial direction orthogonal to said longitudinal and transverse directions, for connecting the carrier part to the base portion, the inner sleeve being inserted into the outer sleeve such that the at least one engagement element on the inner sleeve engages the at least one engagement element on the outer sleeve to fasten the cable or tube to the

carrier part and prevent movement of the inner sleeve relative the outer sleeve in the axial and transverse directions; and

wherein the inner sleeve is spaced from the outer sleeve in the longitudinal direction such that the inner sleeve is displaceable relative to the outer sleeve in the longitudinal direction when the inner sleeve is engaged with the outer sleeve.--

**Claim 10 has been canceled.**

**Claim 11, line 1,** the phrase “The device of claim 10” has been replaced with --The device of claim 9--.

**Claim 15, line 2,** the phrase “having an open end and a closed end” has been deleted.

**Claim 17 has been canceled.**

#### *Allowable Subject Matter*

Claims 7-9, 11-16 are allowed. The following is an examiner's statement of reasons for allowance:

- The prior art does not anticipate the claim 7 limitations as amended above.
- The prior art does not provide any teaching, suggestion or motivation (TSM) to modify the prior art as such.
- There is no cogent reasoning that is unequivocally independent of hindsight that would have led one of ordinary skill in the art at the time the invention was made to modify the prior art to obtain the applicant's invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
